Different propositions and assumptions
L6 Behavioral assurance: a security, privacy, or functional property holds in a stated model.
L5 Authorization: a policy-recognized principal approved the transformation or release.
L4 Process provenance: recorded principals and steps bind input materials to an output artifact.
L3 Derivation: transformed from another object or a shared historical ancestor; direction is explicit.
L2 Resemblance: shared features or behavior under a stated transformation model.
L1 Composition: contains a component, resource, or recognizable code region.
L0 Identity: observed bytes or a cryptographic digest are equal.
